

## OET Preparation Course

OET Preparation Course is an intensive course which aims to prepare and equip OET candidates with fundamental knowledge and skill set along with heaps of test-taking techniques which can literally enable a remarkable performance and guarantee a pass score.

The course takes four weeks with three days of practice every week totaling 20 hours of teaching per week. The class methodology is built upon skill-based and topical syllabus which intends to cover all four modules namely Listening, Reading, Writing, and Speaking as well as two minor sub-skills including Vocabulary and Grammar specified for both verbal and written medical communications.

Every single session of the class will tap into a predetermined set of topics which are elected from within a range of frequently asked health topics in OET exams ensuring to cover if not all but 99% of the topics.

**Important Note:** As this course can accommodate health professionals in a range of professions particularly Nursing, Medicine, Dentistry, Physiotherapy, and Pharmacy, all speaking and writing tasks are differentiated and each profession will be exercised on their own health related topics.

<b>Week 1</b> (The Cardiovascular system and the Muscular system)	<b>Day 1</b>	Introduction on OET structure, scoring procedure, and training plan <b>9:00 - 11:30</b> Writing practice (How to write Heading, Introductory, and first body paragraphs of the professional letter) <b>12:00 – 2:30</b> Reading practice [Part A and Part B] (How to skim and scan) <b>3:00 – 5:30</b> Speaking Practice (talking with patient)
